From Sketch to Screen: Exploring Techniques For A Creative Web Design, 2021-2022

IMentor, 2022-2024

SAMPLE WORK AND PROOF OF PRIOR PUBLICATION EXPERIENCE

Photographer

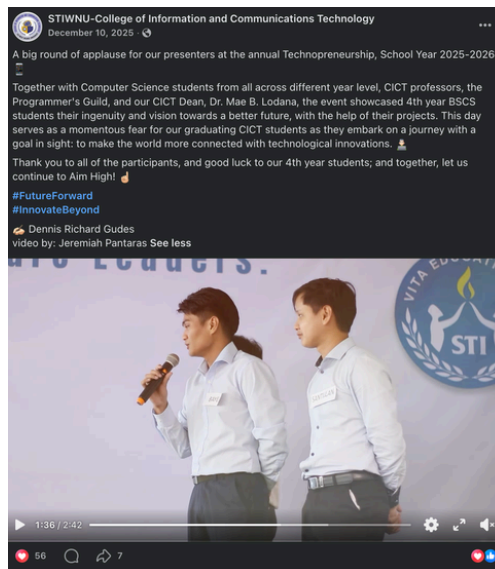

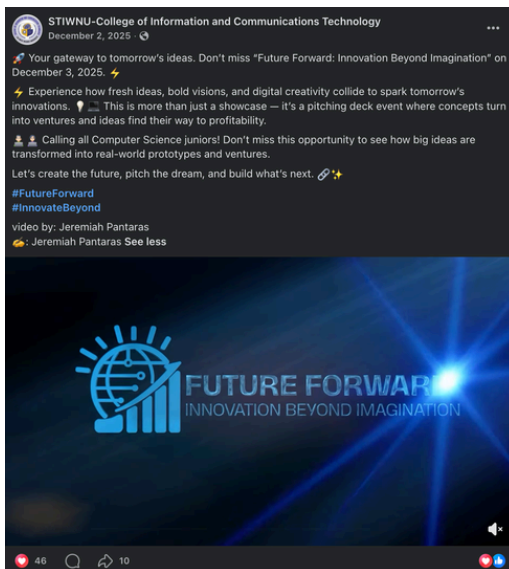

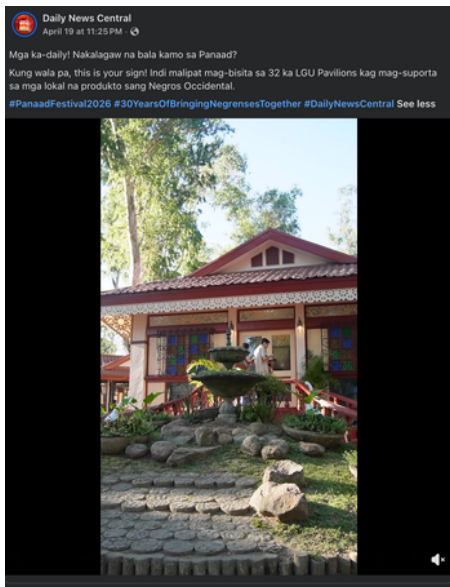

I served as the official photographer for The Torch Bearer throughout the 2025 and 2026 publication cycles. Before this, I was a photographer for Creatives, the official media team of STI West Negros University, from 2022 to 2023. My work includes capturing high-quality images for various university events, projects, and digital publications. I focus on maintaining professional standards while handling the technical aspects of each shoot to ensure consistent visual quality. This experience has allowed me to develop a strong portfolio centered on event-driven content and storytelling.

Graphic Designs

I designed Facebook frames for various university and departmental events and managed the production and layout for the Seniors' yearbook. Additionally, I gained experience in 3D modeling during a workshop and seminar at Holysoft Studios Philippines.

I have produced videos, managed live streams, and created multimedia content for university events and freelance projects. I use tools like OBS Studio and DaVinci Resolve to handle technical production and post-production workflows. My work focuses on delivering high-quality results for digital broadcasts and other multimedia platforms.
