PROJECTS WORK

Orki (Lead Project Manager & Lead Software Developer)	2026 - Present
<i>Orki is a modern, web-app-first platform designed to help board exam takers study smarter, stay consistent, and track their progress with clarity.</i>	
Recivo (Lead Project Manager & Lead Software Developer)	2026 - Present
<i>Recivo is a modern receipt generation platform designed specifically for online sellers and business owners. Create, manage, and share professional receipts in seconds—without the hassle of manual paperwork.</i>	
COS Devs Company Website (Web Developer)	2026 - Present
<i>a modern, multi-page web experience built with React, Vite, and TailwindCSS. We craft digital solutions that transform ideas into reality, blending creativity, technology, and user-centric design.</i>	
Avendro (Freelance Software Developer)	2026 - Present
<i>A comprehensive lending management system built with Django, designed to streamline loan operations and financial management for lending institutions.</i>	
ePuno (Lead Software Developer)	2026 - Present
<i>ePuno is designed as a foundational block, demonstrating the power of localized tracking in a global framework. It is the benchmark in this directory, setting standards for clarity, impact, and user focus.</i>	
Asikaso (Lead Software Developer)	2026 - Present
<i>A modern, full-stack task management application designed for companies to efficiently manage tasks, teams, and projects—providing a seamless experience for teams to collaborate and stay productive.</i>	
Incognito (Lead Software Developer)	2026 - Present
<i>Incognito is a modern web application that allows people to send anonymous messages through a unique, shareable link. It's designed not just for fun confessions, but for honest feedback, suggestions, and civic participation—without fear or bias.</i>	
Satoru (Software Developer)	2025 - Present
<i>a web application designed to intelligently summarize and extract key information from uploaded documents, providing users with quick, distilled insights.</i>	
AI Chat Bot (Software Developer & AI Engineering)	2025 - Present
<i>An Artificial Intelligence chatbot application powered by local LLMs.</i>	
Tabang Negros (Mobile Application Developer)	2025 - 2025
<i>A real-time emergency help request system designed for Negros Island, Philippines.</i>	
Python QR Generator (Web Developer)	2025 - 2025
<i>A sleek Python-based QR code generator that creates beautiful, white-on-transparent QR codes with rounded corners. Perfect for overlaying on dark backgrounds, presentations, or modern web designs</i>	
Car Management System (Web Developer)	2025 - 2025
<i>Developed a web-based Car Management System utilizing Python Django and a MySQL database. This project implements fundamental CRUD operations, featuring a responsive user interface built with Bootstrap.</i>	

Sentinels Student Management System (Full stack Web Developer)	2024 - 2026
<i>A Thesis Study of DevInnovate. Empower your classroom with interactive tasks, real-time progress tracking, and a leaderboard that sparks friendly competition.</i>	
Construction Inventory Management System (Software Developer)	2024 - 2025
<i>A comprehensive system for managing construction inventory.</i>	
Mabels (Full Stack Web Developer)	2022 - 2023
<i>A custom Point of Sale (POS) and inventory management system engineered to streamline operations for Mabel's Resto Bar.</i>
